With this issue for January to March, 1975 the Statistical Bulletin changes from a monthly to a quarterly basis. This Bulletin includes social assistance under the General Welfare Assistance and the Family Benefits Acts as well as the child welfare services of the Children's Aid Societies. The tables have been redesigned to give better and more readable information. The following commentary highlights trends for this quarter.

General Assistance

To make statistics available faster, only data from the larger and consolidated municipal units have been included, i.e., the 53 which are municipalities with populations over 20,000, county welfare units or district administration boards. Together they account for 86 percent of the General Assistance caseload.

At 60,205 cases in March, the caseload was 7.5 percent higher than the year before (March 1974). This upward trend was greatest among families with employable male heads with a 20 percent increase over March 1974. Also substantial was the increase among single employable females and families with unemployable female heads, 14.8 and 13.3 percent respectively. The greater increase in family cases was reflected in the count of beneficiaries which was 8.6 percent higher than the previous March.

Expenditure rose during the fiscal year. During March General Assistance reached \$106 million or 23.7 percent more than the previous March. This reflected both the increase in caseload and the upward rate adjustments.

The breakdown by the Ministry's 19 administrative districts showed a decline in the numbers of beneficiaries in 7 districts over the year. These were more than offset by increases in the more populous districts such as Toronto, Niagara and Waterloo.

Of the general population an average of 1.7 percent were General Assistance beneficiaries in March, 1975. This ranged from a low of 0.6 percent in the Halton and York Regions and the Counties of Perth, Kent and Bruce to a high of 3.8 in the Prescott and Russell County Unit and 3.0 for the Algoma District Administration Board. In the largest administrative units the percentages were 1.9 for Toronto, 1.5 for Ottawa-Carleton and 2.7 for Hamilton-Wentworth.

Family Benefits

The data conform to the same municipal units as General Assistance but with the addition of the unconsolidated counties and districts to give the complete distribution.

The caseload in March 1975 was 92,280 or 3.4 percent higher than March 1974. The number of dependents decreased slightly with the result that beneficiaries increased by only 1.3 percent. During this period there was a noticeable increase of couples (10.0 percent). It should be noted that in July 1974 a new program commenced supplementing the allowances of blind and disabled recipients. This Guaranteed Annual Income System (GAINS) was received by 32,571 initially and increased gradually to 39,647 recipients by March 1975.

Family Benefits expenditure reached \$22.3 million in March 1975, an increase of 35.2 percent over March 1974. This reflected the increase in the caseload, particularly GAINS beneficiaries, and the general upward rate adjustments.

Beneficiaries declined in six of the Ministry's 19 administrative districts, among them Toronto and York-Peel. The provincial average of beneficiaries as a percentage of the general population was 2.5 percent in March 1975. The range was from a low of 0.8 percent in the regional municipality of Peel followed closely by Halton at 0.9 to a high of 9.8 in Manitoulin district and Nipissing next at 8.2 percent. In the largest units, Toronto had 2.2 percent and Ottawa-Carleton 2.4, just under the provincial average while Hamilton-Wentworth was over with 3.3.

The combination of General Assistance and Family Benefits beneficiaries as a percentage of general population is known for the 53 larger reporting units. The provincial average was 4.2 percent in March 1975 ranging from lows of 1.5 and 1.6 in Halton and Peel respectively to highs of 13.0 and 9.3 in Nipissing (excluding North Bay) and the Prescott and Russell unit respectively. In the largest units, Ottawa-Carleton had 3.9 percent, and Metropolitan Toronto 4.1, both just under the provincial average while Hamilton-Wentworth was over with 6.0.

Child Welfare

By March, 1975 the children in care numbered 13,952, a decrease of 2 percent from the previous March. More specifically, children on adoption probation decreased by 9.5 percent and the number in foster homes decreased by 3.3 percent. On the other hand, children in paid institutions increased by 12.3 percent. Non wards of all ages have increased, especially the 13 to 17 years olds who increased 32.1 percent over the year. Society wards also increased in the 13 to 17 year old range (13.8 percent). For age 6 and under both society and crown wards decreased; the society ones by 9.5 and the crown ones by 17.7 percent. Crown wards in all other age groups decreased as well. In the shorter run there has been an overall increase; i.e., from January to March the number of children in care increased 1.7 percent.

The breakdown for the 51 societies showed an average 0.4 percent in care for the general population under age 19. This ranged from a low of 0.1 in Halton to a high of 1.6 in the Kenora district. When protection and other community services were included, the beneficiaries as a percentage of the general population also ranged from a high in Kenora of 2.5 to a low of 0.4 percent in Halton, Kent and Peel. The overall average was 0.5. Toronto with three societies combined and Windsor-Essex with two combined were both above the average at 1.0 while the other most populous centres of Ottawa-Carleton, Hamilton and Niagara were practically at the provincial average.

General Welfare Assistance

Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 53 larger and consolidated municipal administrations have been included, i.e. municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for 86 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e. all family members who are included in the payment calculations.

The municipal units have been grouped by district. For field administration the Ministry has divided the province into 19 districts.

All tables in this part are based on unaudited figures as given by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

Family Benefits

Notes

The Family Benefits Act provides for people who are likely to need social assistance for a longer term. They include the disabled and families where the father is absent or disabled. This programme is administered directly by the Ministry.

The tables give figures for the same municipal units which cover about 86 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes all family members who are included in the payment calculations. Foster parents are not themselves beneficiaries but care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under and over payments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Child Welfare

Notes

The Child Welfare Act is administered by the 51 children's aid societies with funds from the provincial and municipal governments. Generally each society serves one or more counties or districts. One exception is the District of Cochrane where the Kapuskasing society serves the northern portion and the Porcupine one the southern. The other exceptions are Essex, Hamilton and Toronto which have second societies which are Catholic

In the final table (31) beneficiaries are defined as the total of children receiving protection and prevention services and all types of cases as listed in table 23.

All tables in this part are based on reports from the children's aid societies. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

General Assistance

General Assistance data cover municipalities with population in excess of 20,000 and all county welfare units and district administration boards. Together, they number 53 reporting units accounting for about 86 percent of the total General Assistance caseload.

The caseload in June, 1975 was 54,964 or 8.5 percent higher than the year before. The highest rates of increase were by single employable people, males by 32.8 percent and females by 26.8 percent. There was also substantial increase in two categories which accounted for four-fifths of the family cases. Families with employable male heads increased 24.8 percent and those with unemployable female heads increased 18.5 percent. This increase in family cases is reflected in the overall count of beneficiaries which increased by 9.5 percent. The only substantial decrease was 18.9 percent among single employable females but this category accounted for less than two percent of the whole caseload.

Twelve-months cumulative expenditure ending June, 1975 reached \$112 million or 25.6 percent more than the previous 12-months ending June, 1974. This reflected both the increase in caseload and upward rate adjustments.

The breakdown by the Ministry's 19 administrative districts showed declines in the numbers of beneficiaries in Ottawa and in five other districts in June, 1975 as compared with June, 1974 figures. These were more than offset by increases in the three more populous districts of Waterloo, Toronto, and St. Catharines.

Statistics on supplementary aid and special assistance indicate that there is a general downward trend in beneficiaries with a substantial decline in expenditures in the majority of the districts. This trend is the result of the new regulations effective September 1, 1974, under which Family Benefits recipients of Supplementary Aid for drugs program have been transferred to the Ontario Drug Plan.

Of the assessed population in Ontario, an average of 1.5 percent were General Assistance beneficiaries in June, 1975. This ranged from a low of 0.5 percent in the York and Halton regions and the counties of Perth, Bruce, Huron and Kent to a high of 3.7 percent in the Lennox and Addington County Unit. In the largest administrative units the percentages were 1.2 in Ottawa-Carleton, 1.7 in Metropolitan Toronto, and 2.6 in Hamilton-Wentworth.

Family Benefits

The data conform to the same municipal units as General Assistance but with the addition of the unconsolidated counties and districts to give the complete distribution.

The total caseload in June, 1975 was 96,524 or 5.7 percent higher than in June, 1974. The number of dependents increased by only 2.5 percent, with the result that beneficiaries increased by 3.9 percent. The highest increase--14 percent--was among couples. Worth noting is the consistent upward trend in the numbers of recipients under the Guaranteed Annual Income System (GAINS). While in July, 1974 (the month of commencement of GAINS) the number of recipients was 32,571, in June, 1975 it reached 41,629.

Family Benefits expenditure increased from \$17 million in June, 1974 to \$25 million in June, 1975 or 46.4 percent. This reflected a substantial increase in the numbers of beneficiaries under the GAINS and the general upward rate adjustments.

The provincial average of beneficiaries as a percentage of the assessed population was 2.6 percent in June, 1975. The range was from a low of 0.9 percent in the regional municipalities of Peel and Halton to a high of 9.9 percent in Manitoulin and 8.4 in Nipissing. In the largest units, Toronto had 2.3 percent and Ottawa-Carleton 2.5 percent, both slightly below the provincial average, while Hamilton-Wentworth at 3.4 percent was over the provincial average.

The combination of General Assistance and Family Benefits beneficiaries as a percentage of the assessed population refers to the 53 larger reporting units. In June, 1975, the overall average was 4.1 percent, ranging from a low of 1.4 percent in Halton Regional Municipality to a high of 12.0 percent in Nipissing (excluding North Bay). In the largest units, Metropolitan Toronto had 4.0 percent and Ottawa-Carleton 3.7, both just under the provincial average, while Hamilton-Wentworth had 6.0 or almost 2.0 percentage points over the provincial average.

Child Welfare

In June, 1975, the children in care numbered 14,102 or 0.3 percent more than in June, 1974. Most (58.0 percent) children in care were in foster homes where there was a 0.6 percent decrease from the previous June. Children on adoption probation decreased by 13.8 percent and those in group homes by 0.2 percent. However, children in paid institutions increased by 23.9 percent.

The children in care show definite continuing changes with respect to age and type of wardship. Non-wards increased in all age groups, especially, the 13-17 year olds who increased by 45.7 percent over the year. Society wards showed a noticeable increase (22.1 percent) in the 13-17 year old range and a decrease of 8.4 percent in the 0-6 year old range. Crown wards, on the other hand, reported 19.6 and 15.3 percent decline in the 0-6 and 7-12 year old ranges respectively, and only a small increase of 2.2 percent for the 13-17 year olds. In summary, fewer young children under 13 are coming into care while older ones are coming into care in substantially larger numbers. Crown wardship is decreasing while non-ward care is increasing.

The breakdown for the 50 Societies showed an average in care 0.4 percent of the assessed population under the age of 19. This ranged from a low of 0.1 percent in Halton to a high of 1.7 in the Kenora district. When protection and other community services were included, the beneficiaries as a percentage of the assessed population ranged from a low of 0.4 percent in Haldimand-Norfolk, Kent, Halton and Peel to 2.3 percent in Kenora, closely followed by Muskoka (2.1) and Rainy River (2.0). The overall beneficiary average was 0.9 percent. Toronto, with two Societies combined, and Windsor-Essex, with two combined, were both at about 1.0 percent, or slightly in excess of the overall average, while other most populous centres, such as Hamilton and Ottawa-Carleton, were practically at the provincial average.

General Welfare Assistance

Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 53 larger and consolidated municipal administrations have been included, i.e. municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for 86 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e. all family members who are included in the payment calculations.

The municipal units have been grouped by district. For field administration the Ministry has divided the province into 19 districts.

All tables in this part are based on unaudited figures as given by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

Family Benefits

Notes

The Family Benefits Act provides for people who are likely to need social assistance for a longer term. They include the disabled and families where the father is absent or disabled. This programme is administered directly by the Ministry.

The tables give figures for the same municipal units which cover about 86 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes all family members who are included in the payment calculations. Foster parents are not themselves beneficiaries but care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under and over payments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Child Welfare

Notes

The Child Welfare Act is administered by the 50 Children's Aid Societies with funds from the provincial and municipal governments. Generally each Society serves one or more counties or districts. One exception is the District of Cochrane where the Kapuskasing Society serves the northern portion and the Porcupine one the southern. The other exceptions are Essex, Hamilton and Toronto which have second Societies which are Catholic.

In the final table (31) beneficiaries are defined as the total of children receiving protection and prevention services and all types of cases as listed in Table 23.

All tables in this part are based on reports from the Children's Aid Societies. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

General Assistance

General Assistance statistics provided in the Bulletin cover municipalities with populations in excess of 20,000 and all county welfare units and district administration boards. Together, they account for 53 reporting units, covering about 86 percent of the total General Assistance caseload.

The caseload in September 1975 was 53,526 or 8.7 percent higher than the year before. The highest rates of increase were among the employable people, particularly male recipients. Families with employable male heads increased by 37.0 percent, while employable single males increased by 32.9 percent. Also noticeable was the increase among employable females, reaching about 20.0 percent in both female headed units and singles. However, changes in the unemployable category were in a marked contrast to changes in the employable group with unemployable male headed family units and single females declining by 4.6 and 0.5 percent respectively. There was a slight--1.2 percent--increase in unemployable single males. The only exception was unemployable female headed family units, which showed a 10.7 percent increase. Being the largest group, 26 percent of the total, it tends to reflect the general increase in both total caseload and total beneficiaries.

Cumulative expenditure during the twelve-month period ending September 1975 reached \$119 million or 27.6 more than the previous 12 months ending September 1974. This reflected both the increase in caseload and upward rate adjustments.

The breakdown by the Ministry's 19 administrative districts showed substantial declines in the quarterly averages of beneficiaries in Ottawa and somewhat smaller decreases in four other districts in the second fiscal quarter of 1975 as compared with the corresponding quarter of 1974. These were more than offset by increases in the more populous districts of Toronto and St. Catharines.

Supplementary Aid showed a reduction in almost all districts except Toronto. The reduction was 27.2 percent in beneficiaries and but only 2.9 percent in expenditures. Special Assistance changed marginally with only 0.7 percent increase in beneficiaries and 3.3 percent decrease in expenditures.

Of the assessed population in Ontario, General Assistance beneficiaries constituted an average of 1.5 percent in September 1975. This ranged from a low of 0.4 percent in the counties of Huron, Bruce and Kent to 2.8 percent in the Prescott and Russell County Unit. In the largest administrative units the percentages were 0.7 in Ottawa-Carleton, 1.8 in Metropolitan Toronto, 1.9 in Niagara and 2.5 in Hamilton-Wentworth.

Family Benefits

The data conform to the same municipal units as General Assistance but with the addition of the unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in September 1975 was 99,879 or 11.4 percent higher than in September 1974. The number of dependents increased by only 5.6 percent. The highest increase--27.0 percent--was among couples; this was part of the consistent upward trend in recipients under the Guaranteed Annual Income System (GAINS). While in September, 1974 the number of cases under the GAINS was 34,705, a year later it has reached 42,980.

Family Benefits expenditures increased from \$19 million in September 1974 to \$26 million in September, 1975 or 35.9 percent. This reflected a substantial increase in families under the GAINS, and the general upward rate adjustments.

The provincial average of beneficiaries as a percentage of the assessed population was 2.7 percent in September 1975. This ranged from a low of 0.9 in the regional municipality of Peel to a high of 10.0 percent in Manitoulin and 8.3 percent in Nipissing (excluding North Bay). In the largest units, Toronto had 2.4 percent and Ottawa-Carleton 2.6, both slightly below the provincial average, while Hamilton-Wentworth at 3.5 percent and Niagara at 3.2 were above the provincial average.

The combination of General Assistance and Family Benefits beneficiaries as a percentage of the assessed population refers only to the 53 larger reporting units. In September 1975, the overall average was 4.2 percent, ranging from a low of 1.5 percent in Halton Regional Municipality to a high of 11.4 percent in Nipissing (excluding North Bay). In the largest units Metropolitan Toronto had 4.2 percent, the same as the provincial average while Ottawa-Carleton was below at 3.4. Hamilton-Wentworth had 6.0 percent, well above the provincial average and Niagara too was above with 5.1 percent.

Child Welfare

There were 14,042 children in care in September 1975, virtually the same number as the previous September. More specifically, children on adoption probation decreased by 14.4 percent. However, children in paid institutions increased by 16.5 percent. Children in foster homes, which account for 57 percent of total children in care, increased by only 0.1 percent. Non-wards of all ages have increased, particularly the 13 to 17 year olds who increased by 22.4 percent over the year. Society wards showed a noticeable--24.9 percent--increase in the 13 to 17 year old range but a decrease of 13.4 percent in the age group of 6 years and under. Crown wards, on the other hand, reported a negligible--1.6 percent--increase for the 13 to 17 year olds and a decline of 12.3 and 13.6 percent in the 0 to 6 and 7 to 12 year old ranges respectively. In general, fewer children under 13 are coming into care, especially as society wards and crown wards, while older ones are coming into care in substantially larger numbers as non-wards and society wards.

The breakdown for the 50 societies showed an average 0.4 percent in care of the assessed population under the age of 19. This ranged from a low of 0.1 percent in Halton to a high of 1.8 percent in the Kenora district. When protection and other community services were included, the beneficiaries as a percentage of the assessed population ranged from a low of 0.4 percent in Haldimand, Kent, Halton and Peel to a high of 2.8 percent in Kenora and 2.2. percent in Muskoka. The overall average was 0.8 percent. In the most populous centres, Toronto, with two societies combined was at 1.0 percent or slightly above the overall average, while Windsor-Essex and Hamilton both with two societies combined, Ottawa-Carleton, and Niagara were practically at the provincial average.

General Welfare Assistance

Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 53 larger and consolidated municipal administrations have been included, i.e. municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for 86 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e. all family members who are included in the payment calculations.

The municipal units have been grouped by district. For field administration the Ministry has divided the province into 19 districts.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This is done to give more reliable comparisons than the respective comparisons of individual months in previous issues.

All tables in this part are based on unaudited figures as given by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

Family Benefits

Notes

The Family Benefits Act provides for people who are likely to need social assistance for a longer term. They include the disabled and families where the father is absent or disabled. This programme is administered directly by the Ministry.

The tables give figures for the same municipal units which cover about 86 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes all family members who are included in the payment calculations. Foster parents are not themselves beneficiaries but care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under and over payments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Child Welfare

Notes

The Child Welfare Act is administered by the 50 Children's Aid Societies with funds from the provincial and municipal governments. Generally each Society serves one or more counties or districts. One exception is the District of Cochrane where the Kapuskasing Society serves the northern portion and the Porcupine one the southern. The other exceptions are Essex, Hamilton and Toronto which have second Societies which are Catholic.

In the final table (31) beneficiaries are defined as the total of children receiving protection and prevention services and all types of cases as listed in Table 23.

All tables in this part are based on reports from the Children's Aid Societies. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

General Assistance

General Assistance data provided in the Bulletin cover municipalities with population in excess of 20,000 and all county welfare units and district administration boards. Together, they account for 53 reporting units, covering about 86 percent of the total General Assistance caseload.

The caseload in December 1975 was 59,995 or 7.9 percent higher than the year before. The highest rates of increase were among the employable single females (38.1 percent) and employable single males (36.0 percent). Also noticeable was the increase among employable female headed family units (26.0 percent). Employable male headed units increased by 16.4 percent. However, changes in the unemployable category were in marked contrast to changes in the employable group, with unemployable male headed units and single females declining by 7.2 and 5.9 percent respectively. There was a small—2.2 percent—increase in unemployable single males. The only exception was unemployable female headed units, which showed an 8.6 percent increase. Being the largest group—24.0 percent of the total caseload—it tends to reflect the overall increase in both total caseload and total beneficiaries.

Cumulative expenditure during the twelve-month period ending December 1975 rose to \$123 million or 22.9 percent more than the previous 12 months ending December 1974. This reflected both the increase in caseload and the upward rate adjustments.

The breakdown by the Ministry's 19 administrative districts showed a 13.2 percent decline in quarterly averages of beneficiaries in Sudbury and somewhat smaller decreases in Ottawa and Sault Ste. Marie in the third fiscal quarter of 1975 as compared with the corresponding quarter of 1974. These were more than offset by increases in the more populous districts, such as Toronto, St. Catharines and Lindsay.

Supplementary Aid showed a reduction in beneficiaries in all but four districts, resulting in overall average quarterly decline of 36.2 percent. Total expenditure, on the other hand, increased by 14.9 percent. Special Assistance showed a reduction in a majority of districts. However, substantial increases in the more populous districts contributed to the overall increase in both beneficiaries (25.9 percent) and expenditure (17.8 percent).

Of the assessed population in Ontario, General Assistance beneficiaries constituted an average of 1.7 percent in December 1975. This ranged from a low of 0.5 percent in Kent County Unit to a high of 3.7 percent in the Prescott and Russell County Unit. In the largest administrative units the percentages were 1.9 in Metropolitan Toronto, 1.3 in Ottawa-Carleton and 2.6 in Hamilton-Wentworth.

Family Benefits

The data conform to the same municipal units as General Assistance but with the addition of the unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in December 1975 was 102,283 or 12.8 percent higher than in December 1974. The number of dependents increased by 9.1 percent. The highest increase—18.0 percent—was among couples. This was part of the consistent upward trend in recipients under the Guaranteed Annual Income Systems (GAINS), which in December 1975 reached 43,580 or 13.7 percent more than the year before.

Family Benefits expenditure increased from \$21.5 million in December 1974 to \$27.0 million in December 1975 or 25.6 percent. This reflected a noticeable increase in families under the GAINS, and the general upward rate adjustments.

The provincial average of beneficiaries as a percentage of the assessed population was 2.7 percent in December 1975. This ranged from a low of 1.0 percent in Halton and Peel to a high of 9.5 percent in Manitoulin and 8.4 percent in Nipissing (excluding North Bay). In the largest units, Toronto had 2.4 percent and Ottawa-Carleton 2.7 percent, reflecting the provincial average, while Hamilton-Wentworth at 3.7 percent and Niagara at 3.3 percent were above the provincial average.

The combination of General Assistance and Family Benefits beneficiaries as a percentage of the assessed population refers only to the 53 larger reporting units. In December 1975, the overall average was 4.3 percent, ranging from a low of 1.6 percent in Peel to a high of 12.5 percent in Nipissing (excluding North Bay). In the largest units, Metropolitan Toronto had 4.3 percent, the same as the provincial average, while Ottawa-Carleton was slightly below at 4.0. Hamilton-Wentworth had 6.4 percent and Niagara 5.5 percent, both well above the provincial average.

Child Welfare

There were 13,909 children in care in December 1975, an increase of 1.4 percent from the previous December. More specifically, children on adoption probation remained virtually at the same level as the previous December. However, children in paid institutions increased by 11.6 percent. Children in foster homes, which account for 55.0 percent of total children in care, declined by 2.1 percent. Non-wards of all ages have increased, especially the 13 to 17 year olds who increased by 41.7 percent over the year. Society wards showed 13.7 percent increase in the 13 to 17 year old range, but a decrease of 9.6 percent in the age group of 6 years and under. Crown wards showed 15.1 percent decrease for the 7 to 12 year olds and 2.0 percent increase for the 13 to 17 year olds. In general, fewer children under 13 are coming into care, especially as society and crown wards, while older ones are coming into care in substantially larger numbers as non-wards and society wards.

The breakdown for the 50 societies showed an average 0.4 percent in care of the assessed population under the age of 19. This ranged from a low of 0.1 percent in Halton to a high of 1.9 percent in Kenora. When protection and other community services were included, the beneficiaries as a percentage of total assessed population ranged from a low of 0.4 percent in Kent, Halton and Peel to a high of 3.3 percent in Kenora and 2.2 percent in Muskoka. The overall average was 0.8 percent. In the most populous centres, Toronto, with two societies combined was at 1.0 percent or slightly above the provincial average; while Windsor-Essex and Hamilton with two societies combined as well as Ottawa-Carleton and Niagara were practically at the provincial average.

General Welfare Assistance

Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 53 larger and consolidated municipal administrations have been included, i.e. municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for 86 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e. all family members who are included in the payment calculations.

The municipal units have been grouped by district. For field administration the Ministry had divided the province into 19 districts.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This is done to give more reliable comparisons than the respective comparisons of individual months in previous issues.

All tables in this part are based on unaudited figures as given by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

Family Benefits

Notes

The Family Benefits Act provides for people who are likely to need social assistance for a longer term. They include the disabled and families where the father is absent or disabled. This programme is administered directly by the Ministry.

The tables give figures for the same municipal units which cover about 86 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes all family members who are included in the payment calculations. Foster parents are not themselves beneficiaries but care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under and over payments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Child Welfare

Notes

The Child Welfare Act is administered by the 50 Children's Aid Societies with funds from the provincial and municipal governments. Generally each Society serves one or more counties or districts. One exception is the District of Cochrane where the Kapuskasing Society serves the northern portion and the Porcupine one the southern. The other exceptions are Essex, Hamilton and Toronto which have second Societies which are Catholic.

In the final table (31) beneficiaries are defined as the total of children receiving protection and prevention services and all other types of cases.

All tables in this part are based on reports from the Children's Aid Societies. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

General Assistance

General Assistance data provided in the Bulletin cover municipalities with population in excess of 20,000 and all county welfare units and district administration boards. Together, they account for 53 reporting units covering about 86 percent of the total General Assistance caseload.

The caseload in March 1976 was 57,908 or 3.8 percent lower than the year before. The highest rates of decline were among the extended care residents (57.9 percent) and foster children (30.6). Also noticeable was the decline among employable male headed family units (11.9 percent), followed by unemployable single females (8.2 percent). However, the unemployable female headed family units showed a 3.8 percent increase. Being the largest group—25.3 percent of the total caseload—it offset the overall decrease to only 3.8 percent.

Cumulative expenditure during the twelve-month period ending March 1976 rose to \$138.6 million or 17.3 percent more than the previous 12 months ending March 1975. This reflected a small increase in female headed family units and the upward rate adjustments.

The breakdown by the Ministry's 19 administrative districts showed the average quarterly declines of beneficiaries in a majority of districts. The highest rates of decline were reported in Sudbury (21.2 percent) and Waterloo (20.0 percent). These were offset by increases in the more populous districts, such as Toronto, St. Catharines and Lindsay.

Supplementary Aid showed a reduction in beneficiaries in all but three districts resulting in overall average quarterly decline of 40.8 percent. Total expenditure, on the other hand increased by 34.8 percent.

Special Assistance showed a reduction in beneficiaries in ten districts. However, substantial increases in the more populous districts contributed to the overall increase in both beneficiaries (19.9 percent) and expenditure (46.7 percent).

Of the assessed population in Ontario, General Assistance beneficiaries constituted an average of 1.6 percent in March 1976. This ranged from a low of 0.4 percent in Kent County Unit to a high of 3.4 percent in Prescott and Russell County Unit. In the largest administrative units the percentages were 1.9 in Toronto, 1.4 in Ottawa-Carleton and 2.4 in Hamilton-Wentworth.

Family Benefits

The data conform to the same municipal units as General Assistance but with the addition of the unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in March 1976 was 101,953 or 10.5 percent higher than in March 1975. The number of dependents increased by 7.3 resulting in an overall increase in beneficiaries by 8.8 percent. During this period there was a noticeable increase of families with children (13.1 percent). Single persons under the Guaranteed Annual Income System (GAINS) showed a somewhat higher increase (10.0 percent) than singles without GAINS (8.7 percent). However, changes in families without children showed a slight decline (0.2 percent) which was in marked contrast to changes in the same category during the previous three quarters, when the increases ranged from 14.0 to 27.0 percent.

Family Benefits expenditure increased from \$22.3 million in March 1975 to \$26.8 million in March 1976 or 20.3 percent. This reflected a noticeable increase in families with children and the general upward rate adjustments.

The provincial average of beneficiaries as a percentage of the assessed population was 2.7 percent in March 1976. This ranged from a low of 0.9 percent in Peel to a high of 9.0 percent in Manitoulin. In the largest units, Toronto had 2.3 percent and Ottawa-Carleton 2.6 percent, both slightly below the provincial average; while Hamilton-Wentworth at 3.6 percent and Niagara at 3.3 percent were above the provincial average.

The combination of General Assistance and Family Benefits beneficiaries as a percentage of the assessed population refers only to the 53 larger reporting units. In March 1976, the overall average was 4.2 percent, ranging from a low of 1.1 percent in Halton to a high of 12.9 percent in Nipissing (excluding North Bay). In the largest units, Toronto had 4.2 percent, the same as the provincial average, while Ottawa-Carleton at 3.9 percent was slightly below. Hamilton-Wentworth had 6.0 percent and Niagara 5.2 percent, both well above the provincial average.

Child Welfare

By March 1976, the children in care numbered 13,710, a decrease of 1.7 percent from the previous March. More specifically, children on adoption probation increased by 1.0 percent, while children in foster homes and paid institutions decreased by 5.7 percent and 3.3 percent respectively. Non-wards of all ages have increased, especially the 7 to 12 year olds, showing a 19.6 percent increase from the previous March. Society wards showed a noticeable decrease (11.8 percent) in the age group of 6 years and under, but an increase of 3.6 percent in the 13 to 17 year old range. Crown wards showed a 14.2 percent decrease for the 7 to 12 year olds and a negligible—1.1 percent—increase in the 13 to 17 year old range. In general, fewer children under 13 are coming into care as society and crown wards, which more than offset a marked increase of children in non-wards of all ages and a slight increase in older groups of society and crown wards.

The breakdown for the 50 societies showed an average 0.4 percent in care of the assessed population under the age of 19. This ranged from a low of 0.1 percent in Halton to a high of 1.9 percent in Kenora. When protection and other community services were included, the beneficiaries as a percentage of total assessed population ranged from a low of 0.4 percent in Kent, Halton and Peel to a high of 3.4 percent in Kenora and 2.0 in Muskoka. The overall average was 0.8 percent. In the most populous centres, Toronto and Windsor-Essex, both with two societies combined, as well as Ottawa-Carleton were slightly above the provincial average, while Hamilton with two societies combined and Niagara were at the provincial average.

General Welfare Assistance

Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 53 larger and consolidated municipal administrations have been included, i.e. municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for 86 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e. all family members who are included in the payment calculations.

The municipal units have been grouped by district. For field administration the Ministry had divided the province into 19 districts.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This is done to give more reliable comparisons than the respective comparisons of individual months in previous issues.

All tables in this part are based on unaudited figures as given by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

Family Benefits

Notes

The Family Benefits Act provides for people who are likely to need social assistance for a longer term. They include the disabled and families where the father is absent or disabled. This programme is administered directly by the Ministry.

The tables give figures for the same municipal units which cover about 86 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes all family members who are included in the payment calculations. Foster parents are not themselves beneficiaries but care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under and over payments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Child Welfare

Notes

The Child Welfare Act is administered by the 50 Children's Aid Societies with funds from the provincial and municipal governments. Generally each Society serves one or more counties or districts. One exception is the District of Cochrane where the Kapuskasing Society serves the northern portion and the Porcupine one the southern. The other exceptions are Essex, Hamilton and Toronto which have second Societies which are Catholic.

In the final table (31) beneficiaries are defined as the total of children receiving protection and prevention services and all other types of cases.

All tables in this part are based on reports from the Children's Aid Societies. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

General Assistance

General Assistance data provided in the Bulletin cover municipalities with population in excess of 20,000 and all county welfare units and district administration boards. Together, they account for 53 reporting units covering about 86 percent of the total General Assistance caseload.

The caseload in June 1976 was 50,355 or 8.4 percent lower than the year before. The declines varied widely among various groups of recipients, the highest rates being among the extended care (77.9 percent) and intermediate care residents (51.9 percent). This group of recipients together with foster children constitute a small proportion of the recipients and do not reflect the overall decline in the total caseload. In the employable category, all recipients showed noticeable declines. The highest was among employable single persons, with a decrease of 25.8 percent for females and 19.8 percent for males. In the unemployable category, single males increased by 6.9 percent, while single females declined by 5.6 percent. The unemployable female headed family units showed only a 1.6 percent decline. Being the largest group - 27.5 percent of total caseload - it offset the overall decrease to 8.4 percent.

Cumulative expenditure during the twelve-month period ending June 1976 rose to \$137.6 million or 12.2 percent more than the previous 12 months ending June 1975.

The breakdown by the Ministry's 19 administrative districts showed declines in quarterly averages of beneficiaries in the first fiscal quarter of 1976 as compared with the corresponding quarter of 1975 in 16 districts. The highest rates of decline were reported in Waterloo (18.7 percent), Hamilton (17.5 percent) and Sudbury (16.9 percent) and the lowest in Toronto (0.6 percent) and Ottawa-Carleton (0.7 percent).

Supplementary Aid showed a substantial reduction in beneficiaries in all districts, resulting in overall average quarterly decline of 38.4 percent. Total expenditures, on the other hand, showed a marginal (1.3 percent) increase. In the case of Special Assistance, 13 districts reported declines in beneficiaries in the first fiscal quarter of 1976 as compared with the corresponding quarter of 1975. However, substantial increases in the more populous districts, such as Toronto and Hamilton, offset the overall reduction in beneficiaries to 8.3 percent. The overall expenditure on Special Assistance decreased by 11.9 percent.

Of the assessed population in Ontario, General Assistance beneficiaries constituted an average of 1.4 percent in June 1976. This ranged from a low of 0.3 percent in Kent County Unit to a high of 2.3 percent in Kingston. In the largest administrative units the percentages were 1.7 in Metropolitan Toronto, 1.1 in Ottawa-Carleton and 2.0 in Hamilton-Wentworth.

Family Benefits

The data conform to the same municipal units as General Assistance but with the addition of the unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in June 1976 was 104,024 or 7.8 percent higher than in June 1975. During this period there was a noticeable increase (11.9 percent) of families with children and somewhat smaller increase (7.0 percent) among singles. It should be noted, however, that single persons under the Guaranteed Annual Income System (GAINS) declined by 1.7 percent, while singles without GAINS increased by 31.9 percent. In case of families without children, those under the GAINS declined by 14.8 percent as compared with a 1.2 percent decline for couples without GAINS. Families with children also showed a variation in changes. Those under the GAINS increased by only 4.4 percent, while families with GAINS increased by 12.6.

The expenditure increased from \$25.4 million in June 1975 to \$27.4 million in June 1976 or 7.9 percent. This is in marked contrast to the expenditure increases of the reporting months in the previous four quarters, when such increases ranged from 20.3 to 46.4 percent.

The provincial average of beneficiaries as a percentage of the assessed population was 2.7 percent in June 1976. This ranged from a low of 1.0 percent in Halton and Peel to a high of 9.1 percent in Manitoulin and 8.4 percent in Nipissing (excluding North Bay). In the largest units, Toronto had 2.4 percent, or slightly below provincial average, Ottawa-Carleton had 2.7 percent, reflecting the provincial average, while Hamilton-Wentworth at 3.7 percent and Niagara at 3.3 percent were above the provincial average.

The combination of General Assistance and Family Benefits beneficiaries as a percentage of the assessed population refers only to the 53 larger reporting units. In

June 1976, the overall average was 4.0 percent, ranging from 1.4 percent in Perth to 11.9 percent in Nipissing (excluding North Bay). In the largest units, Toronto had 4.1 percent, slightly above and Hamilton-Wentworth and Niagara well above the provincial average. Ottawa-Carleton at 3.8 percent was slightly below the provincial average.

Child Welfare

There were 13,405 children in care in June 1976, a decrease of 4.9 percent from June 1975. Of these, children in paid institutions declined by 18.0 percent, while children in group homes and other locations increased by 13.4 and 3.8 percent respectively. Children on adoption probation declined marginally (1.0 percent). However, children in foster homes, which account for 56 percent of total children in care, declined by 7.4 percent. Society wards of all ages have also declined, with 13 to 17 year olds showing 10.0 percent decrease. Non-wards showed 6.6 percent decrease in the age group of 6 years and under and 9.1 percent increase for the 7 to 12 year olds. Crown wards, on the other hand, reported 2.9 percent increase in the age group of 6 years and under and 12.4 percent decline for the 7 to 12 year olds. In general, there was a noticeable decline in children coming into care as society and crown wards, especially those 7 years of age and older.

The breakdown for the 50 societies showed an average 0.4 percent of children in care of the assessed population under age 19. This ranged from a low of 0.1 percent in Halton to a high of 1.9 percent in Kenora. When protection and other community services were included, the beneficiaries as a percentage of total assessed population ranged from a low of 0.4 percent in Kent, Halton, Durham and Peel to a high of 3.5 percent in Kenora and 1.9 percent in Muskoka. The overall average was 0.8 percent. In the most populous centres, Toronto with two societies combined and Ottawa-Carleton were slightly above the provincial average; while Windsor-Essex and Hamilton, both with two societies combined and Niagara were at the provincial average.

General Welfare Assistance

Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 53 larger and consolidated municipal administrations have been included, i.e. municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for 86 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e. all family members who are included in the payment calculations.

The municipal units have been grouped by district. For field administration the Ministry has divided the province into 19 districts.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This is done to give more reliable comparisons than the respective comparisons of individual months in previous issues.

All tables in this part are based on unaudited figures as given by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

Family Benefits

Notes

The Family Benefits Act provides for people who are likely to need social assistance for a longer term. They include the disabled and families where the father is absent or disabled. This programme is administered directly by the Ministry.

The tables give figures for the same municipal units which cover about 86 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes all family members who are included in the payment calculations. Foster parents are not themselves beneficiaries but care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under and over payments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Child Welfare

Notes

The Child Welfare Act is administered by the 50 Children's Aid Societies with funds from the provincial and municipal governments. Generally each Society serves one or more counties or districts. One exception is the District of Cochrane where the Kapuskasing Society serves the northern portion and the Porcupine one the southern. The other exceptions are Essex, Hamilton and Toronto which have second Societies which are Catholic.

In the final table (31) beneficiaries are defined as the total of children receiving protection and prevention services and all other types of cases.

All tables in this part are based on reports from the Children's Aid Societies. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

General Assistance

General Assistance data provided in the Bulletin cover municipalities with population in excess of 20,000 and all county welfare units and district administration boards. Together, they account for 53* reporting units covering about 86 percent of the total General Assistance caseload.

The caseload in September 1976 was 48,447 or 9.5 percent lower than the year before. The declines varied widely among various groups of recipients, the highest rates being among the nursing home residents (about 35 percent). However, this group of recipients constitutes a small proportion of total caseload and does not reflect the overall decline. There was a noticeable reduction in the employable category. The highest was among employable single persons, with a decrease of 29.5 percent for females and 23.4 percent for males. In the unemployable category, single males increased by 4.0 percent, while single females declined by the same percentage. The unemployable female headed family units declined by 4.6 percent. Being the largest group -- 27.2 percent of the total caseload -- it offset the overall decrease to 9.5 percent.

Twelve-months cumulative expenditure ending September 1976 reached \$122.5 million or 2.9 percent more than the previous 12 months ending September 1975.

The breakdown by the Ministry's 19 administrative districts showed declines in the quarterly averages of beneficiaries in 17 districts in the second fiscal quarter of 1976 as compared with the corresponding quarter of 1975. The highest rates of decline were in Kenora (24.4 percent), Windsor (24.1 percent) and Hamilton (21.3 percent), and the lowest in York-Peel (2.0 percent), Toronto (3.1 percent) and Thunder Bay (3.6 percent). Ottawa-Carleton, on the other hand, showed 24.8 percent increase in beneficiaries.

Supplementary Aid showed a reduction in beneficiaries in 16 districts resulting in overall quarterly average decline of 13.1 percent. Total expenditures, however, increased by 5.3 percent.

Special Assistance showed a decrease in quarterly averages of beneficiaries in 15 districts, with overall average decline of 17.1 percent. This was accompanied by 11.3 percent reduction in total expenditure.

Of the assessed population in Ontario, General Assistance beneficiaries constituted an average of 1.3 percent in September 1976. This ranged from a low of 0.3 percent in Kent County Unit to a high of 2.8 percent in Prescott and Russell County Unit. In the largest administrative units, the percentages were 1.7 in Toronto, 1.0 in Ottawa-Carleton and 1.8 in Hamilton-Wentworth.

Family Benefits

The data conform to the same municipal units as General Assistance but with the addition of the unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in September 1976 was 105,981 or 6.1 percent higher than the year before. During this period there was a noticeable increase (10.3 percent) in families with children, somewhat smaller increase (5.5 percent) among singles and a substantial decline (18.0 percent) among couples. It should be noted, however, that single persons and families with children under the guaranteed Annual Income System (GAINS) declined by 4.5 percent and 0.9 percent respectively.

The expenditure increased from \$26.2 million in September 1975 to \$27.6 million in September 1976 or 5.2 percent. This compares favourably with the much larger increases of the reporting months in the previous four quarters.

The provincial average of beneficiaries as a percentage of the assessed population was 2.8 percent in September 1976. This ranged from a low of 1.0 percent in Halton, Peel and Perth to a high of 9.1 percent in Manitoulin and 8.3 percent in Nipissing (excluding North Bay). In the largest units, Toronto had 2.4 and Ottawa-Carleton 2.7 percent, both slightly below the provincial average; while Hamilton-Wentworth at 3.8 percent and Niagara at 3.4 percent were above the provincial average.

The combination of General Assistance and Family Benefits beneficiaries as a percentage of the assessed population refers only to the 53* larger reporting units. In September 1976, the overall average was 4.0 percent, ranging from a low of 1.6 percent in Perth, Peel and Halton to a high of 11.9 percent in Nipissing (excluding North Bay). In the largest units, Toronto had 4.1

percent or slightly above the provincial average, while Ottawa-Carleton at 3.7 percent was slightly below. However, Hamilton-Wentworth at 5.7 percent and Niagara at 4.7 percent were above the provincial average.

Child Welfare

In September 1976, the children in care numbered 13,150 or 6.4 percent less than in September 1975. More specifically, children in paid institutions declined by 18.7 percent, while children in adoption probation and in foster homes decreased by 8.3 percent and 6.8 percent respectively.

Distribution of children by age and type of wardship showed a wide variety of changes. Non-wards reported a noticeable decrease (9.8 percent) in the age group of 6 years and under, but an increase of 4.2 percent in the 13 to 17 year old range. Society wards of all ages have declined, especially 13 to 17 year olds, showing 16.0 percent drop from the previous September. Crown wards, on the other hand, showed a 10.2 percent decrease for the 7 to 12 year olds and a 3.5 percent increase for the 13 to 17 year olds. In general, there was a noticeable decline in children coming into care as society and crown wards, especially those 7 years of age and older.

The breakdown for the 50 societies showed an average 0.4 percent of children in care of the assessed population under the age of 19. This ranged from a low of 0.1 percent in Halton to a high of 1.9 percent in Kenora. When protection and other community services were included, the beneficiaries as a percentage of total assessed population ranged from a low of 0.4 percent in Haldimand, Kent, Lambton, York, Durham and Peel to a high of 3.5 percent in Kenora and 2.0 percent in Muskoka. The overall average was 0.8 percent. In the most populous centres, Toronto and Windsor-Essex, both with two societies combined were at 1.0 percent and 0.9 percent respectively, or slightly in excess of the overall average. Hamilton-Wentworth, with two societies combined and Ottawa-Carleton were at the provincial average, while Niagara at 0.7 percent was slightly below the overall average.

* As of September 1, 1976, county of Middlesex (excluding city of London) was consolidated into a separate county welfare unit and will be reported as such in the next Quarterly Statistical Bulletin.

General Welfare Assistance

Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 53 larger and consolidated municipal administrations have been included, i.e. municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for 86 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e. all family members who are included in the payment calculations.

The municipal units have been grouped by district. For field administration the Ministry had divided the province into 19 districts.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This is done to give more reliable comparisons than the respective comparisons of individual months in previous issues.

All tables in this part are based on unaudited figures as given by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

Family Benefits

Notes

The Family Benefits Act provides for people who are likely to need social assistance for a longer term. They include the disabled and families where the father is absent or disabled. This programme is administered directly by the Ministry.

The tables give figures for the same municipal units which cover about 86 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes all family members who are included in the payment calculations. Foster parents are not themselves beneficiaries but care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under and over payments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Child Welfare

Notes

The Child Welfare Act is administered by the 50 Children's Aid Societies with funds from the provincial and municipal governments. Generally each Society serves one or more counties or districts. One exception is the District of Cochrane where the Kapuskasing Society serves the northern portion and the Porcupine one the southern. The other exceptions are Essex, Hamilton and Toronto which have second Societies which are Catholic.

In the final table (31) beneficiaries are defined as the total of children receiving protection and prevention services and all other types of cases.

All tables in this part are based on reports from the Children's Aid Societies. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

General Assistance

General Assistance data provided in the Bulletin cover municipalities with population in excess of 20,000 and all county welfare units and district administration boards. Together, they account for 54 reporting units covering about 86 percent of the total caseload.

The caseload in December 1976 was 53,900 or 10.4 percent lower than the year before. The declines varied widely among various groups of recipients, the highest rates being reported among the nursing home residents (about 60 percent). However, this group of recipients constitutes a negligible proportion of total caseload and does not reflect the overall reduction. There was a substantial reduction in the employable category, particularly among single females (30.3 percent) and single males (20.1 percent). In the unemployable category, single males increased by 6.4 percent, while single females declined by 0.8 percent. The unemployable female headed family units declined by 11.5 percent, tending to reflect the overall decreases in both caseload and beneficiaries.

Twelve-months cumulative expenditures ending December 1976 amounted to \$120.4 million or 2.5 percent less than the previous 12 months ending December 1976.

The breakdown by the Ministry's 19 administrative districts showed declines in the quarterly averages of beneficiaries in 17 districts in the third fiscal quarter of 1976 as compared with the corresponding quarter of 1975. The rates of decline varied widely, the largest being reported in Kenora (39.2 percent) and Windsor (28.6 percent) and the lowest in Barrie (7.3 percent) and Lindsay (7.5 percent). Belleville, on the other hand, showed 14.0 percent increase, while York-Peel reported 0.2 percent increase.

Supplementary Aid showed a reduction in beneficiaries in nine districts, ranging from 63.8 percent in York-Peel to 8.5 percent in Belleville. However, substantial increases in large districts such as Toronto (39.7 percent) and Ottawa-Carleton (76.5 percent) contributed to the overall increase in beneficiaries of 23.4 percent and to the expenditures of 17.5 percent.

Special Assistance showed a reduction in quarterly averages of beneficiaries in 16 districts, with an overall decline of 6.4 percent. However, expenditures increased by 12.5 percent, although 13 districts reported decreases. Toronto, with a 40.5 percent increase in expenditures more than offset the trend.

Of the assessed population in Ontario, General Assistance beneficiaries constituted an average of 1.4 percent in December 1976. This ranged from a low of 0.4 percent in Kent County Unit to a high of 3.2 percent in Prescott and Russell County Unit. In the largest administrative units, the percentages were 1.7 in Toronto, 1.0 in Ottawa-Carleton and 2.1 in Hamilton-Wentworth.

Family Benefits

The data conform to the same municipal units as General Assistance but with the addition of the unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in December 1976 was 107,491 or 5.1 percent higher than the year before. During this period there was a general decline among recipients under the Guaranteed Annual Income System (GAINS) and a general increase among recipients without GAINS. The highest increase (37.7 percent) was among single persons without GAINS, while the largest reduction (22.4 percent) was among couples under the GAINS.

The expenditures increased from approximately \$27.0 million in December 1975 to \$27.9 million in December 1976 or 3.5 percent. This compares favourably with the much larger increases of the reporting months in the previous four quarters.

The provincial average of beneficiaries as a percentage of the assessed population was 2.8 percent in December 1976. This ranged from a low of 1.0 percent in Halton, Peel and Perth to a high of 8.9 percent in Manitoulin and 8.4 percent in Nipissing (excluding North Bay). In the largest units, Toronto had 2.5 and Ottawa-Carleton 2.7 percent, both slightly below the provincial average; while Hamilton-Wentworth at 3.9 percent and Niagara at 3.4 percent were above the provincial average.

The combination of General Assistance and Family Benefits beneficiaries as the percentage of the assessed population refers only to the 54 larger reporting units. In December 1976, the overall average was 4.2 percent, ranging from a low of 1.6 percent in Halton to a high of 12.8 percent in Nipissing (excluding North Bay). In the largest units, Toronto had 4.2 percent, reflecting the provincial average, while Ottawa-Carleton at 3.7 percent was slightly below. However, Hamilton-Wentworth at 6.0 percent and Niagara at 5.0 percent were above the provincial average.

Child Welfare

In December 1976, the children in care numbered 12,962 or 6.8 percent less than in December 1975. More specifically, children in paid institutions and in adoption probation declined by 18.4 and 18.7 percent respectively. Children in foster homes decreased by 3.3 percent, while children in group homes increased by 1.4 percent.

Distribution of children by age and type of wardship showed overall decline, the largest being among 13 to-17 year olds in society wards (12.7 percent) and non-wards (10.1 percent). All wards reported a noticeable decline among children below seven years of age. It ranged from 7.0 percent in society wards to 9.0 percent in crown wards.

The breakdown for the 50 societies showed an average 0.4 percent of children in care of the assessed population under the age of 19. This ranged from a low of 0.1 percent in Halton to a high of 1.9 percent in Kenora. When protection and other community services were included, the beneficiaries as a percentage of total assessed population ranged from a low of 0.4 percent in Kent, Lambton, Durham and Peel to a high of 3.7 percent in Kenora and 2.1 in Muskoka. The overall average was 0.8 percent. In the most populous centres, Toronto and Windsor-Essex, both with two societies combined, were at 1.0 percent and 0.9 percent respectively, or slightly in excess of the overall average. Ottawa-Carleton at 0.9 percent was also slightly above. Hamilton-Wentworth with two societies combined and Niagara were at the provincial average.

General Welfare Assistance

Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 54 larger and consolidated municipal administrations have been included, i.e. municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for 86 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e. all family members who are included in the payment calculations.

The municipal units have been grouped by district. For field administration the Ministry had divided the province into 19 districts.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This is done to give more reliable comparisons than the respective comparisons of individual months in previous issues.

All tables in this part are based on unaudited figures as given by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

Family Benefits

Notes

The Family Benefits Act provides for people who are likely to need social assistance for a longer term. They include the disabled and families where the father is absent or disabled. This programme is administered directly by the Ministry.

The tables give figures for the same municipal units which cover about 86 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes all family members who are included in the payment calculations. Foster parents are not themselves beneficiaries but care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under and over payments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Child Welfare

Notes

The Child Welfare Act is administered by the 50 Children's Aid Societies with funds from the provincial and municipal governments. Generally each Society serves one or more counties or districts. One exception is the District of Cochrane where the Kapuskasing Society serves the northern portion and the Porcupine one the southern. The other exceptions are Essex, Hamilton and Toronto which have second Societies which are Catholic.

In the final table (31) beneficiaries are defined as the total of children receiving protection and prevention services and all other types of cases.

All tables in this part are based on reports from the Children's Aid Societies. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

Highlights

General Assistance

General Assistance data provided in the Bulletin cover municipalities with population in excess of 20,000 and all county welfare units and district administration boards. Together, they account for 54 reporting units covering about 86 percent of the total caseload.

The caseload in March 1977 was 57,021 or 1.8 percent lower than in March 1976. The most noticeable declines were among unemployable female headed family units (10. percent) and employable single females (9.3 percent). However, employable female headed family units increased by 18.9 percent and unemployable single males increased by 8.5 percent.

Twelve-months cumulative expenditures ending March 1977 amounted to \$117.1 million or 7.3 percent less than the previous 12 months ending March 1976.

The breakdown by the Ministry's 19 administrative districts showed declines in the quarterly averages of beneficiaries in 14 districts in the fourth fiscal quarter ending March 1977 as compared with the corresponding quarter ending March 1976. The rates of decline varied widely, the largest being reported in Keewatin-Kenora (46.9 percent) and Windsor (31.5 percent) and the smallest in London (1.8 percent) and Toronto (3.9 percent). Sault Ste. Marie, on the other hand, showed 10.9 percent increase, while Waterloo indicated no change.

Supplementary Aid showed an increase in quarterly averages of beneficiaries in 9 districts, while the decline were reported by 8 districts, with a majority of large districts being in the latter group. However, substantial increase in Toronto district (32.9 percent) contributed to the overall increase in beneficiaries of 13.8 percent and to the increase of total expenditures of 14.1 percent.

Special Assistance showed an increase in quarterly averages of beneficiaries in 9 districts, ranging from 0.6 percent in Thunder Bay to 82.3 percent in St. Catharine. However, noticeable declines in large districts, such as Toronto (10.7 percent) and Hamilton (37.1 percent) more than offset the trend, contributing to an overall decrease in beneficiaries of 13.6 percent and to the total decline in expenditures of 11.2 percent.

Child Welfare

In March 1977, the children in care numbered 13,211 or 3.6 percent less than in March 1976. More specifically, children on adoption probation declined by 20.8 percent, while children in paid institutions and in foster homes decreased by 5.1 and 2.2 percent respectively. However, children in group homes increased by 0.5 percent and children in receiving homes or own institutions by 4.2 percent.

Distribution of children by age and type of wardship showed wide variation in trends. Crown wards of all ages have decreased, the largest (11.0 percent) being among children below 7 years of age. Non-wards showed declines of 7.2 percent for 7 to 12 year olds and 4.4 percent for children below 7 years of age. However, children between 13 and 17 years of age increased by 9.9 percent. Society wards on the other hand reported a 3.0 percent increase for children below 7 years of age and a decline of 7.0 percent for 7 to 12 year olds and 4.3 percent for 13 to 17 year olds.

The breakdown for the 50 societies showed an average 0.4 percent of children in care of the assessed population under the age of 19. This ranged from a low of 0.1 percent in Halton and Hastings to a high of 1.9 percent in Kenora. When protection and other community services were included, the beneficiaries as a percentage of total assessed population ranged from a low of 0.4 percent in Haldimand, Kent, Lambton, York, Durham and Peel to a high of 3.8 percent in Kenora and 2.0 percent in Muskoka. The overall average was 0.8 percent. In the most populous centres, Toronto with two societies combined at 1.0 percent and Ottawa-Carleton at 0.9 percent were slightly above the provincial average. Hamilton-Wentworth and Windsor-Essex both with two societies combined and Niagara -- all at 0.8 percent -- were at the provincial average.

Of the assessed population in Ontario, General Assistance beneficiaries constituted an average of 1.5 percent in March 1977. This ranged from a low of 0.5 percent in Barrie and Kent to a high of 3.5 percent in Prescott and Russell County Unit. In the largest administrative units, the percentages were 1.8 in Toronto, 1.2 in Ottawa-Carleton and 2.1 in Hamilton-Wentworth.

Family Benefits

The data conform to the same municipal units as General Assistance but with the addition of the unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in March 1977 was 109,017 or 6.9 percent higher than the year before. During this period there was a general decline of 8.6 percent among recipients under the Guaranteed Annual Income System (GAINS) and a general increase of 10.5 percent among recipients without GAINS. The highest increase (40.8 percent) was among singles without GAINS, while the largest decrease (14.6 percent) was among couples under the GAINS.

The expenditures increased from \$26.8 million in March 1976 to \$28.1 million in March 1977 or 4.8 percent. More specifically, expenditure on recipients without GAINS increased by 13.2 percent, while those under the GAINS declined by 8.0 percent.

The provincial average of beneficiaries as a percentage of the assessed population was 2.8 percent in March 1977. This ranged from a low of 1.0 percent in Peel to a high of 8.7 percent in Manitoulin and 8.3 percent in Nipissing (excluding North Bay). In the largest units, Toronto had 2.5 percent and Ottawa-Carleton 2.6 percent, both slightly below the provincial average; while Hamilton-Wentworth at 3.9 percent and Niagara at 3.4 percent were above the provincial average.

The combination of General Assistance and Family Benefits beneficiaries as the percentage of the assessed population refers only to the 54 larger reporting units. In March 1977, the overall average was 4.2 percent, ranging from a low of 1.6 percent in Peel and Halton to a high of 12.0 percent in Nipissing (excluding North Bay) and 8.9 percent in Prescott and Russell. In the largest units, Toronto had 4.3 percent, reflecting the provincial average, while Ottawa-Carleton at 3.8 percent was slightly below the overall average. However, Hamilton-Wentworth at 6.0 percent and Niagara at 5.1 percent were above the provincial average.

General Welfare Assistance

Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 54 larger and consolidated municipal administrations have been included, i.e., municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for about 86 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e., all family members who are included in the payment calculations.

The municipal units have been grouped by district. For field administration the Ministry had divided the province into 19 districts.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This is done to give more reliable comparisons than the respective comparisons of individual months in previous issues.

All tables in this part are based on unaudited figures as given by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

Part II

Family Benefits

Notes

The Family Benefits Act provides for people who are likely to need social assistance for a longer term. They include the disabled and families where the father is absent or disabled. This programme is administered directly by the Ministry.

The tables give figures for the same municipal units which cover about 86 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes all family members who are included in the payment calculations. Foster parents are not themselves beneficiaries but care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under and over payments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Part III

Child Welfare

Notes

The Child Welfare Act is administered by the 50 Children's Aid Societies with funds from the provincial and municipal governments. Generally each Society serves one or more counties or districts. One exception is the District of Cochrane where the Kapuskasing Society serves the northern portion and the Porcupine one the southern. The other exceptions are Essex, Hamilton and Toronto which have second Societies which are Catholic.

In the final table (31) beneficiaries are defined as the total of children receiving protection and prevention services and all other types of cases.

All tables in this part are based on reports from the Children's Aid Societies. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

General Assistance

General Assistance data provided in the Bulletin cover municipalities with population in excess of 20,000 and all county welfare units and district administration boards. Together, they account for 54 reporting units covering about 88 percent of the total caseload.

The caseload in June 1977 was 51,879 or 2.8 percent higher than in June 1976. The most noticeable increases were among employables, where single males showed 30.8 percent increase, single females 24.6 percent and female headed family units 22.8 percent. However, unemployable female headed family units declined by 11.9 percent. Being the largest group—24 percent of the total caseload—it offset the overall increase to 2.8 percent.

Twelve-months cumulative expenditures ending June 1977 amounted to \$117.7 million or 6.2 percent less than the previous 12 months ending June 1976.

The breakdown by the Ministry's 19 administrative districts showed declines in the quarterly averages of beneficiaries in 13 districts in the first fiscal quarter ending June 1977 as compared with the corresponding quarter ending June 1976. The highest rates of decline were in Windsor (30.8 percent) and Thunder Bay (20.0 percent) and the lowest in London (0.4 percent) and Kingston (2.9 percent). Noticeable increases were reported in Lindsay (11.9 percent) and Cornwall (9.3 percent).

Supplementary Aid showed an increase in quarterly averages of beneficiaries in 14 districts, resulting in an overall quarterly average increase of 18.9 percent. Total expenditures, however, jumped to 39.1 percent.

Special Assistance showed a decline in quarterly averages of beneficiaries in 10 districts. However, substantial increases in Toronto district (23.0 percent) and Waterloo district (102.6 percent) more than offset the trend, contributing to an overall increase in beneficiaries of 10.7 percent and to the total increase in expenditures of 40.0 percent.

Of the assessed population in Ontario, General Assistance beneficiaries constituted an average 1.3 percent in June 1977. This ranged from a low of 0.4 percent in York, Bruce, Halton, Lambton, Perth and Kent to a high of 2.9 percent in Prescott and Russell and 2.3 percent in Kingston. In the largest administrative units, the percentages were 1.7 in Toronto, 1.1 in Ottawa-Carleton and 2.0 in Hamilton-Wentworth.

Family Benefits

The data conform to the same municipal units as General Assistance but with the addition of the unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in June 1977 was 111,059 or 6.8 percent higher than the year before. During this period, there was a noticeable increase in families with children (9.0 percent) and foster parents (9.4 percent), a somewhat smaller increase among singles (5.6 percent) and a moderate decline among couples (4.6 percent). More specifically, there was a 1.5 percent decline among recipients under the Guaranteed Annual Income System (GAINS) and a 12.0 percent increase among recipients without GAINS.

The expenditures increased from \$27.4 million in June 1976 to \$31.3 million in June 1977 or 14.0 percent.

The provincial average of beneficiaries as a percentage of the assessed population was 2.8 percent in June 1977. This ranged from a low of 1.0 percent in Peel to a high of 8.8 percent in Manitoulin. In the largest units, Toronto had 2.5 and Ottawa-Carleton 2.6 percent, both slightly below the provincial average; while Hamilton-Wentworth at 4.0 percent and Niagara at 3.4 percent were well above the provincial average.

The combination of General Assistance and Family Benefits beneficiaries as a percentage of the assessed population refers only to the 54 larger reporting units. In June 1977, the overall average was 4.1 percent, ranging from a low of 1.5 percent in Perth and Halton to a high of 11.6 percent in Nipissing (excluding North Bay) and 8.3 percent in Prescott and Russell. In the largest units, Toronto had 4.3 percent or slightly above the provincial average, while Ottawa-Carleton at 3.8 percent was slightly below. However, Hamilton-Wentworth at 6.0 percent and Niagara at 4.7 percent were above the provincial average.

Child Welfare

In June 1977, the children in care numbered 13,304 or 0.8 percent less than in June 1976. More specifically, children in paid institutions and group homes increased by 6.7 and 3.9 percent respectively, while children on adoption probation declined by 18.9 percent.

Distribution of children by age and type of wardship showed a wide variation in trends. Crown wards of all ages have decreased, the largest (7.2 percent) being among children below 7 years of age. Non-wards showed a decline of 5.9 percent for children below 7 years of age, a moderate (7.3 percent) increase for 7 to 12 year-olds and a substantial (30.4 percent) increase for 13 to 17 year-olds. Society wards, on the other hand, reported small changes for children in all age groups.

The breakdown for the 50 societies showed an average 0.4 percent of children in care of the assessed population under the age of 19. This ranged from a low of 0.1 percent in Halton and Hastings to a high of 2.0 percent in Kenora. When protection and other community services were included, the beneficiaries as a percentage of total assessed population ranged from a low of 0.4 percent in Kent, Lambton and Durham to a high of 3.7 percent in Kenora and 2.0 percent in Muskoka. The overall average was 0.8 percent. In the most populous centres, Toronto and Hamilton-Wentworth both with two societies combined at 1.0 percent and Ottawa-Carleton at 0.9 percent were slightly above the provincial average. Windsor-Essex (two societies combined) and Niagara—both at 0.8 percent—were at the provincial average.

General Welfare Assistance

Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 54 larger and consolidated municipal administrations have been included, i.e., municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for about 88 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e., all family members who are included in the payment calculations.

The municipal units have been grouped by district. For field administration the Ministry had divided the province into 19 districts.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This is done to give more reliable comparisons than the respective comparisons of individual months in other tables.

All tables in this part are based on unaudited figures as given by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

Family Benefits

Notes

The Family Benefits Act provides for people who are likely to need social assistance for a longer term. They include the disabled and families where the father is absent or disabled. This programme is administered directly by the Ministry.

The tables give figures for the same municipal units which cover about 88 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes all family members who are included in the payment calculations. Foster parents are not themselves beneficiaries but care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under and over payments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Child Welfare

Notes

The Child Welfare Act is administered by the 50 Children's Aid Societies with funds from the provincial and municipal governments. Generally, each Society serves one or more counties or districts. One exception is the District of Cochrane where the Kapuskasing Society serves the northern portion and the Porcupine one the southern. The other exceptions are Essex, Hamilton and Toronto which have second Societies which are Catholic.

In the final table (31) beneficiaries are defined as the total of children receiving protection and prevention services and all other types of cases.

All tables in this part are based on reports from the Children's Aid Societies. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

General Assistance

General Assistance statistics provided in the Bulletin cover municipalities with population in excess of 20,000 and all county welfare units and district administration boards. Together, they account for 54 reporting units covering about 88 percent of the total caseload.

The caseload in September 1977 was 53,031 or 9.1 percent higher than in September 1976. The highest rates of increases were among employables, with single females showing 41.3 percent increase and single males 33.3 percent. However, unemployable female headed family units declined by 2.1 percent. Being the largest group—24.5 percent of the total caseload—it offset the overall increase of the total caseload to 9.1 percent and of total beneficiaries to 4.4 percent.

Twelve-months cumulative expenditures ending September 1977 amounted to \$121.2 million or 1.0 percent less than the previous 12 months ending September 1976. It should be noted that a substantial decrease in drugs accounts and a marked increase in income adjustments are reflected in the overall decline of expenditures.

The breakdown by the Ministry's 19 administrative districts showed increases in the quarterly averages of beneficiaries in 12 districts in the second fiscal quarter ending September 1977 as compared with the corresponding quarter ending September 1976. The highest rates of increase were in Lindsay (22.2 percent), Belleville (13.1 percent), Ottawa (12.4 percent) and Cornwall (12.2 percent). The highest rates of decline were in Keewatin-Kenora (28.7 percent), Thunder Bay (19.7 percent), Kirkland Lake (18.3 percent) and Windsor (17.6 percent).

Supplementary Aid showed an increase in quarterly averages of beneficiaries in 15 districts, resulting in an overall quarterly average increase of 22.7 percent. Total expenditures, however, increased by 32.8 percent.

Special Assistance showed an increase in quarterly averages of beneficiaries in 10 districts, while the declines were reported by 9 districts. The overall quarterly average in beneficiaries increased by 34.3 percent and total expenditures by 48.0 percent.

Of the assessed population in Ontario, General Assistance beneficiaries constituted an average 1.3 percent in September 1977. This ranged from a low of 0.3 percent in Perth and Kent to a high of 2.8 percent in Prescott and Russell and 2.5 percent in Kingston. In the largest administrative units, the percentages were 1.8 in Toronto, 1.1 in Ottawa-Carleton and 2.0 in Hamilton-Wentworth.

Family Benefits

The data conform to the same municipal units as General Assistance but with the addition of the unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in September 1977 was 111,444 or 5.2 percent higher than the year before. During this period, there was a noticeable increase (9.6 percent) among recipients not covered by the Guaranteed Annual Income System (GAINS) and a small decline (2.1 percent) among recipients under GAINS.

The expenditures increased from \$27.6 million in September 1976 to \$31.2 million in September 1977 or 13.0 percent. It should be noted, however, that during the last four months the changes in expenditures were very small.

The provincial average of beneficiaries as a percentage of the assessed population was 2.8 percent in September 1977. This ranged from a low of 1.0 percent in Peel to a high of 8.3 percent in Manitoulin. In the largest units, Toronto had 2.5 percent and Ottawa-Carleton 2.6 percent—both slightly below the provincial average—while Hamilton-Wentworth at 4.1 percent and Niagara at 3.4 percent were well above the provincial average.

The combination of General Assistance and Family Benefits beneficiaries as a percentage of the assessed population refers only to the 54 larger reporting units. In September 1977, the overall average was 4.1 percent, ranging from a low of 1.5 percent in Perth and Halton to a high of 11.8 percent in Nipissing (excluding North Bay) and 8.3 percent in Kingston. In the largest units, Toronto had 4.3 percent or slightly above the provincial average while Ottawa-Carleton at 3.8 percent was slightly below. However, Hamilton-Wentworth at 6.0 percent and Niagara at 5.0 percent were well above the provincial average.

Child Welfare

In September 1977, the children in care numbered 13,242 or 0.7 percent more than in September 1976. More specifically, children in paid institutions increased by 17.2 percent, children in adoption probation declined by 15.0 percent, while foster children remained virtually at the same level.

Distribution of children by age and type of wardship showed a wide variation in trends. Crown wards of all ages have shown a decline, the largest—9.1 percent—being among children below 7 years of age. Non-wards showed a substantial—32.8 percent—increase for 13 to 17 year olds and the moderate increases—3.7 and 7.7 percent—for children below 7 years of age and 7 to 12 year olds respectively. Society wards, on the other hand, reported 8.1 percent decrease for children below 7 years of age and 6.8 percent increase for 13 to 17 year olds.

The breakdown for the 50 societies showed an average 0.4 percent of children in care of the assessed population under the age of 19. This ranged from a low of 0.1 percent in Halton and Hastings to a high of 2.0 percent in Kenora. When protection and other community services were included, the beneficiaries as a percentage of total population ranged from a low of 0.4 percent in Lambton and York to a high of 3.8 percent in Kenora and 2.1 percent in Muskoka. The overall average was 0.8 percent. The most populous centres, Toronto and Hamilton-Wentworth (both with two societies combined) at 1.0 percent and Windsor-Essex (two societies combined) and Ottawa-Carleton at 0.9 percent were slightly above the provincial average, while Niagara at 0.8 percent was at the provincial average.

General Welfare Assistance

Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 54 larger and consolidated municipal administrations have been included, i.e., municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for about 88 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e., all family members who are included in the payment calculations.

The municipal units have been grouped by district. For field administration the Ministry had divided the province into 19 districts.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This is done to give more reliable comparisons than the respective comparisons of individual months in other tables.

All tables in this part are based on unaudited figures as given by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

Family Benefits

Notes

The Family Benefits Act provides for people who are likely to need social assistance for a longer term. They include the disabled and families where the father is absent or disabled. This programme is administered directly by the Ministry.

The tables give figures for the same municipal units which cover about 88 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes all family members who are included in the payment calculations. Foster parents are not themselves beneficiaries but care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under and over payments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Child Welfare

Notes

The Child Welfare Act is administered by the 50 Children's Aid Societies with funds from the provincial and municipal governments. Generally, each Society serves one or more counties or districts. One exception is the District of Cochrane where the Kapuskasing Society serves the northern portion and the Porcupine one the southern. The other exceptions are Essex, Hamilton and Toronto which have second Societies which are Catholic.

In the final table (31) beneficiaries are defined as the total of children receiving protection and prevention services and all other types of cases.

All tables in this part are based on reports from the Children's Aid Societies. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

General Assistance

General Assistance statistics provided in the Bulletin cover municipalities with populations in excess of 20,000 and all county welfare units and district administration boards. Together, they account for 54 reporting units covering about 88 percent of the total caseload in Ontario.

The caseload in December 1977 was 58,936 or 9.3 percent higher than in December 1976. The highest rates of increase were among employables, with single females showing a 37.6 percent increase and single males 24.9 percent. The smallest increase—0.1 percent—was reported for unemployable male headed family units.

Twelve-months cumulative expenditures ending December 1977 amounted to \$126.1 million or 4.7 percent more than the previous 12 months ending December 1976.

The breakdown by the Ministry's 19 administrative districts showed increases in the quarterly averages of beneficiaries in 11 districts in the third fiscal quarter ending December 1977 as compared with the corresponding quarter ending December 1976. The substantial increases were in Lindsay (22.1 percent), Cornwall (18.0 percent) and St. Catharines (17.2 percent); and the noticeable rates of decline were in Thunder Bay (12.5 percent) and Windsor (9.8 percent).

Supplementary Aid showed an increase in quarterly averages of beneficiaries in 13 districts, resulting in an overall quarterly average increase of 12.6 percent. Total expenditures increased by 19.2 percent.

Special Assistance showed an increase in quarterly averages of beneficiaries also in 13 districts with an overall quarterly average increase of 29.2 percent. Total expenditures increased by 20.3 percent.

Of the assessed population in Ontario, General Assistance beneficiaries constituted an average 1.5 percent in December 1977. This ranged from a low of 0.4 percent in Perth and Kent to a high of 3.8 percent in Prescott and Russell. In the largest administrative units, the percentages were 1.8 in Toronto and Niagara, 1.1 in Ottawa-Carleton and 2.4 in Hamilton-Wentworth.

Family Benefits

The data conform to the same municipal units as General Assistance but with the addition of the unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in December 1977 was 111,492 or 3.7 percent higher than the year before. During this period, there was a noticeable (9.6 percent) increase among recipients not covered by the Guaranteed Annual Income System (GAINS), particularly among family units without children (23.0 percent) and singles (13.4 percent). There was a general decrease among recipients under GAINS, with couples declining by 9.5 percent and families with children by 7.3 percent.

The expenditures increased from \$27.9 million in December 1976 to \$31.2 million in December 1977 or 11.7 percent. It should be noted, however, that during the last seven months the changes in total expenditures were of negligible proportion.

The provincial average of beneficiaries as a percentage of the assessed population was 2.8 percent in December 1977. This ranged from a low of 1.0 percent in Halton and Peel to a high of 8.2 percent in Manitoulin. In the largest units, Toronto had 2.5 percent and Ottawa-Carleton 2.6 percent—both slightly below the provincial average. Hamilton-Wentworth at 4.0 percent and Niagara at 3.3 percent were well above the provincial average.

The combination of General Assistance and Family Benefits beneficiaries as a percentage of the assessed population refers to the 54 larger reporting units. In December 1977, the overall average was 4.3 percent, ranging from a low of 1.5 percent in Perth to a high of 12.2 percent in Nipissing (excluding North Bay) and 9.1 percent in Prescott and Russell. In the largest units, Toronto with 4.3 percent was at the provincial average while Ottawa-Carleton with 3.7 percent was below. However, Hamilton-Wentworth at 6.4 percent and Niagara at 5.2 percent were well above the provincial average.

Child Welfare

In December 1977, the children in care numbered 13,125 or 1.3 percent more than in December 1976. More specifically, children in paid institutions increased by 23.7 percent, while children on adoption probation declined by 14.3 percent.

Distribution of children by age and type of wardship showed a wide variation in trends. Non-wards of all ages increased, the largest (44.0 percent) being among children 13 to 17 years old. Society wards reported 9.3 percent and 12.0 percent decline for children below 7 years of age and 7 to 12 year olds respectively, and a 12.9 percent increase for children 13 to 17 years of age. Crown wards, on the other hand, showed a general decline of all ages, the largest (7.5 percent) being among children below 7 years of age.

The breakdown for the 50 societies showed an average 0.4 percent of children in care of the assessed population under the age of 19. This ranged from a low of 0.1 percent in Halton and Hastings to a high of 2.0 percent in Kenora. When protection and other community services were included, the beneficiaries as a percentage of total population ranged from a low of 0.4 percent in Haldimand and York to a high of 3.8 percent in Kenora and 2.2 percent in Muskoka. The overall average was 0.9 percent. The largest centres, Toronto and Hamilton-Wentworth (both with two societies combined) at 1.0 percent and 1.1 percent respectively were slightly above the provincial average, while Ottawa-Carleton and Niagara at 0.9 percent were at the provincial average.

General Welfare Assistance

Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 54 larger and consolidated municipal administrations have been included, i.e., municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for about 88 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e., all family members who are included in the payment calculations.

The municipal units have been grouped by district. For field administration the Ministry had divided the province into 19 districts.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This is done to give more reliable comparisons than the respective comparisons of individual months in other tables.

All tables in this part are based on unaudited figures as given by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

Family Benefits

Notes

The Family Benefits Act provides for people who are likely to need social assistance for a longer term. They include the disabled and families where the father is absent or disabled. This programme is administered directly by the Ministry.

The tables give figures for the same municipal units which cover about 88 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes all family members who are included in the payment calculations. Foster parents are not themselves beneficiaries but care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under and over payments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Child Welfare

Notes

The Child Welfare Act is administered by the 50 Children's Aid Societies with funds from the provincial and municipal governments. Generally, each Society serves one or more counties or districts. One exception is the District of Cochrane where the Kapuskasing Society serves the northern portion and the Porcupine one the southern. The other exceptions are Essex, Hamilton and Toronto which have second Societies which are Catholic.

In the final table (31) beneficiaries are defined as the total of children receiving protection and prevention services and all other types of cases.

All tables in this part are based on reports from the Children's Aid Societies. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.
